

# Integrations

## Endpoint overview

### Requesting ads

Name	Path	Response Type	# of returned ads
<u>JSON 'GET'</u>	/json/	Default JSON response	One per requested position
<u>JSON 'POST'</u>	/json/	Default JSON response	One per requested position
AD (almost deprecated)	/ad/	HTML, XML, JSON or JS Depends on UI position configuration and used templates	Only one position can be requested. Depending on the format type (stack or not) we return 1 ad or all available ads
<u>STACK</u>	/stack/	Custom JSON response, depends on the advar template	Amount is decided by the max_ads parameter in the request.
