

# Navigating the Adhese documentation

Explanation of the search and navigation options in the Adhese documentation..

- [Search and navigation](#)

# Search and navigation

## Introduction

The Adhese documentation is created using [Bookstack](#) as a documentation platform. The Adhese Documentation is organised into different **shelves**:

1. Adhese Documentation Introduction
2. Adhese Implementation
3. Adops Documentation
4. Release Notes
5. Newsletter Archive

Each shelf contains one or more **books**:

### 2. Adhese Implementation

This shelf bundles documentation concerning implementing Adhese such as: inventory setup, Gateway...

■ Privacy & Consent

■ Integration & setup

■ Inventory Management

■ Templating

■ Measure

■ Monitoring and Reporting

■ Gateway

■ Adhese API

■ Troubleshooting

### 3. Adops Documentation

Contains all documentation on Adhese necessary for day to day adops operations.

■ Gateway

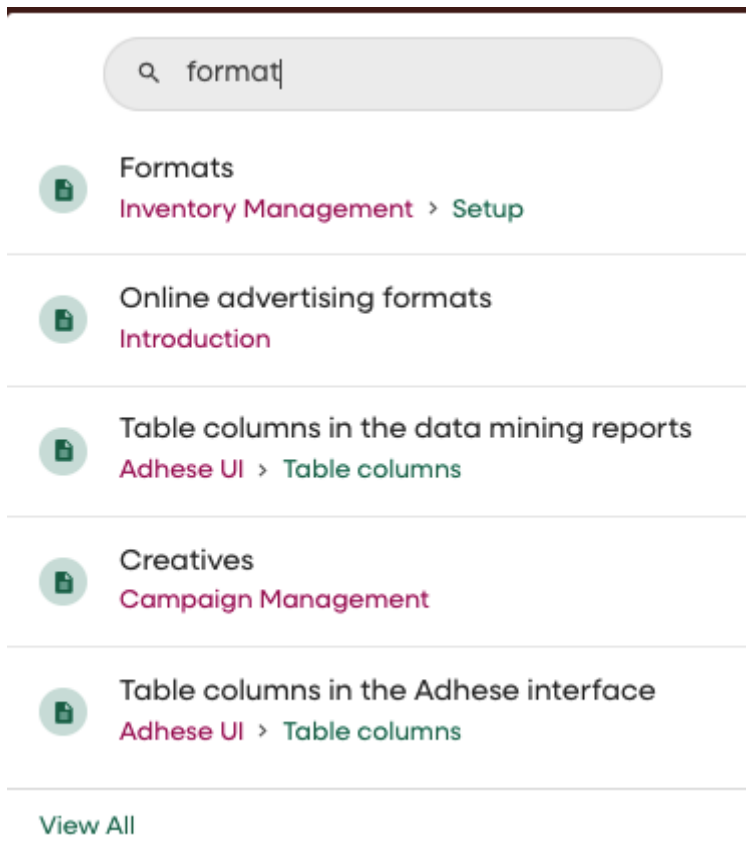

■ Troubleshooting

## Search

At the top of the page, you will find the main **search** box for the Adhese Documentation.

When you enter a search term in this box, a drop-down menu of relevant books (or articles) is displayed:

# Views

The Adhese documentation offers two different viewing options: grid or list view, which can be selected using the links in the right column.

- Shelves Grid View

### Gateway

Contains information on managing your Gateway connections.

### Monitoring and Reporting

This section goes more in depth on internal and external data sources for processing Adhese dc

# Navigation

The screenshot shows the Adhese documentation interface. At the top, there's a dark header with the Adhese logo, a search bar, and links for 'Shelves' and 'Books'. Below the header, a breadcrumb trail indicates the current location: 'Shelves' > '2. Adhese Implementation' > 'Gateway' > 'Adhese Gateway'. On the left side, there are two navigation panels: 'Page Navigation' with links like 'Enable competition with RT...' and 'Gateway Debug Logging', and 'Book Navigation' with a list of sections including 'Gateway', 'Adhese Gateway' (highlighted), 'Gateway configuration', 'Gateway dashboard', 'Wikin', and 'List of third-party ad servers and marketplaces'. The main content area is titled 'Adhese Gateway' and contains text explaining its function: 'The Adhese Gateway lets direct sales compete with real-time bidding (RTB) systems. – optimising revenue from every advertising space in real-time.' It also describes the cascade structure for ad prioritization. Below the text is a sequence diagram showing the interaction between a 'Client', 'Ad Server', and 'SSP'. The Client sends an ad request to the Ad Server, which returns an RTB ad. The Client also sends a bid request to the SSP.

```

sequenceDiagram
    participant Client
    participant Ad Server
    participant SSP
    Client->>Ad Server: send ad request
    Ad Server-->>Client: return RTB ad
    Client->>SSP: send bid request
  
```

There are several methods for navigating the Adhese documentation.

- You will see a **breadcrumb** trail just below the search box.
- When you open a page in a book, two blocks appear in the left-hand column: **Page Navigation** and **Book Navigation**. The Page Navigation provides an overview of the different sections on a page, while the Book Navigation shows all the pages (or sections) of a given book. You can click on a section in page navigation to jump to that section.
- In the top right corner, you can navigate to the **Shelves** overview. A box on the left-hand side shows your **Recently Viewed** items and a box of **Popular Shelves**.
